As one of the first Lyft drivers in Metro Detroit, I discovered a new horizon in Detroit's technological explosion. With Lyft, I helped navigate new drivers to the platform, consistently hit new milestones and transported people from all walks of life. These experiences ignited a change in my career direction to become a web developer.

Before joining an intensive coding bootcamp, I had extensive experience as a property management professional. I traveled through roles in sales and leasing and communicated with C-level executives and processed financials. Through all of my work, I have taken a solutions-focused approach to solving problems for others. After graduation from Grand Circus in December 2018, I seek to apply that same approach with clean code at an organization looking for a positive, adaptable and capable programmer.

## EDUCATION

Grand Circus, Detroit, MI

December 2018

After Hours Front-End Development Bootcamp

- Projects include: AHBC\_Midterm\_WAM: <https://bit.ly/2J1qb5v> Movie Lab: <https://bit.ly/2ABz4A7> Final project: <https://w2app.herokuapp.com/#/> <https://github.com/Abaseman0514/WeatherWhere>
